

Standards-Based and Customer Centered Solutions

Synetra Structured Cabling Group (SCG) offers a variety of cabling solutions to fit your network infrastructure needs, helping businesses like yours to more quickly meet your application objectives. With our unique pairing of decades of experience and advanced training, Synetra SCG provides our clients unparalleled access to excellence in design, installation, and maintenance of structured network cable infrastructure. Our SCG team of dedicated experts is here to meet a variety of your business needs through flexible and scalable solutions.

Benefits & Features

Top Notch Solutions

Synetra SCG is a standards based, customer centered division with the resources to facilitate low voltage, copper category cabling, fiber optic cable installation and termination, aerial and buried application, as well as a variety of wireless and other need driven deployments. Whether adding data/voice drops at your facility, fiber optic solutions between IDF/MDF, IP video surveillance and security, or custom applications—we ensure your project is on time and within budget.

Our SCG division facilitates a variety of unique structured cabling needs, including:

- ▶ Low voltage, copper category cabling
- ▶ Fiber optic cable installation and termination
- ▶ Aerial and buried application
- ▶ Wireless and other need-driven deployments
- ▶ Quality cabling and security solutions for existing structures, new construction, rebuilds and retrofits

SCG solutions include:

- ▶ Optical fiber LAN/WAN/MAN
- ▶ Cat3, Cat5, Cat5E, Cat6, Cat6A
- ▶ High pair-count copper
- ▶ Data center build out
- ▶ Coax
- ▶ Low voltage composite cable
- ▶ Audio/visual solutions
- ▶ IP video surveillance and security solutions

IP Video Surveillance and Security

Synetra is licensed by the Private Security Bureau of the Texas Department of Public Safety, for the installation and service of security products such as IP video surveillance. We offer the highest quality of work and unparalleled technical ability. With the expertise and experience of our in-house professional staff, you have the benefit of innovative design strategy and services of the highest standard.

Features of IP video surveillance and security:

- ▶ Recording times can be configured to a client's needs (most often 10-30 days)
- ▶ User friendly interface
- ▶ Viewable from any PC on the network
- ▶ Mobile app available
- ▶ HD video capable
- ▶ Unlimited number of cameras

E-Rate Eligible

Self-provisioned fiber is now eligible for funding in the E-Rate Program as a Category One service. Eligible entities can construct a fiber WAN connecting their eligible locations. **Talk to Synetra to learn more today.**

Professionals You Can Trust

Access to Experts

Synetra's engineers and technicians maintain the highest levels of industry certification, and as a company we are regularly recognized by our OEM partners for excellence in customer satisfaction.
